Quantifying sources of variation in the frequency of fungi associated with spruce beetles: Implications for hypothesis testing and sampling methodology in bark beetle–symbiont relationships
B.H. Aukema (Madison, WI, USA and Victoria, Canada), R.A. Werner (Covallis, OR, USA), K.E. Haberkern, B.L. Illman, M.K. Clayton and K.F. Raffa (Madison, WI, USA) 187
Derivation of compatible crown width equations for some important tree species of Spain
S. Condés (Madrid, Spain) and H. Sterba (Vienna, Austria) 203
Is browsing the major factor of silver fir decline in the Vosges Mountains of France?
P. Heuze, A. Schnitzler (Metz, France) and F. Klein (Bar le Duc, France) 219
Relationship of understory diversity to soil nitrogen, topographic variation, and stand age in an eastern oak forest, USA
C.J. Small (Radford, VA, USA) and B.C. McCarthy (Athens, OH, USA) 229
Effects of regenerating forest cover on soil microbial communities: A case study in hilly red soil region, Southern China
H. Zheng, Z.Y. Ouyang, X.K. Wang, Z.G. Fang, T.Q. Zhao and H. Miao (Beijing, China) 244
Mortality and recovery of eucalypt beetle pest and beneficial arthropod populations after commercial application of the insecticide alpha-cypermethrin
A.D. Loch (Manjimup, Australia and NSW, Australia) 255
Is forest fragmentation driven by the spatial configuration of land quality?. The case of western Oregon
R.J. Alig, D.J. Lewis and J.J. Swenson (Corvallis, OR, USA) 266
Comparing composition and structure in old-growth and harvested (selection and diameter-limit cuts) northern hardwood stands in Quebec
V.A. Angers, C. Messier, M. Beaudet and A. Leduc (Montréal, Canada) 275
Restoration of a forest ecosystem: The effects of vegetation and dispersal capabilities on the reassembly of plant-dwelling arthropods
M.L. Moir (Perth, Australia), K.E.C. Brennan (VIC, Australia), J.M. Koch (Applecross, Australia), J.D. Majer (Perth, Australia) and M.J. Fletcher (NSW, Australia) 294
Relative resistance of willow and poplar biomass production clones across a continuum of herbivorous insect specialization: Univariate and multivariate approaches
E.E. Nordman (Syracuse, NY, USA), D.J. Robison (Raleigh, NC, USA), L.P. Abrahamson and T.A. Volk (Syracuse, NY, USA) 307
Coarse woody debris dynamics in the southern Appalachians as affected by topographic position and anthropogenic disturbance history
C.R. Webster (Houghton, MI, USA) and M.A. Jenkins (Gatlinburg, TN, USA) 319
Changes to headwater stream morphology, habitats and riparian vegetation recorded 15 years after pre-Forest Practices Code forest clearfelling in upland granite terrain, Tasmania, Australia
P.E. Davies, P.D. McIntosh, M. Wapstra, S.E.H. Bunce, L.S.J. Cook, B. French and S.A. Munks (Tasmania, Australia) 331
Changes in woody plant composition of three vegetation types exposed to a similar fire regime for over 46 years
G. Nangendo, A. Stein (Overijssel, The Netherlands), H. ter Steege (Utrecht, The Netherlands) and F. Bongers (Wageningen, The Netherlands) 351
Restoring tropical biodiversity: Leaf traits predict growth and survival of late-successional trees in early-successional environments
C. Martínez-Garza (Chicago, IL, USA), V. Peña, M. Ricker, A. Campos (Veracruz, Mexico) and H.F. Howe (Chicago, IL, USA) 365
